Re: Recommendation Letter

To whom it may concern,

This letter is written as a recommendation for Fastrac Electric Corporation for electrical services within the construction industry. Having worked on several commercial projects with Fastrac in the St. Lucie County area, I can honestly say that the success of those projects was mainly achieved through the hard work and dedication from the management staff at Fastrac.

The projects previously referred to were with the School Board of St. Lucie County. These projects often times involve accelerated schedules, strict compliance with general building codes, stringent manpower requirements, cost savings through value engineering, sales tax savings programs, constant safety awareness with regards to the students on an occupied campus and a general meticulous nature with documentation to project records. Fastrac's proactive approach to these and many other parameters to the project scope had a direct affect on the project's excellent success. Their management on all levels, field supervision as well as the corporate office, has been a pleasure to work with. It would be nice to say that I could work with them on all my future projects.

If you have any comments or questions regarding this recommendation, please do not hesitate to contact me through my corporate headquarters at (954) 733-4211.

Very truly yours,
JAMES A. CUMMINGS, INC.

Guy Reese
Project Manager
